

ADJUSTOR- 747

(7% Ionic Magnesium - 7% Ionic Nitrogen - 4% Stable carbon and 747 ppm Zn)

A Humic - Acid formulation to suit a broad range of soil and crop types, used to reduce soil acidity, plant sap acidity and to increase carbohydrate production. ADJUSTOR 747 has been designed for soil application and foliar spraying.

IMPORTANT BENEFITS OF ADJUSTOR 747

- > Increase uptake of phosphorus and increase leaves photonic activity.
- > Stimulates chlorophyll and carbohydrate production.
- > Increase root development through its zinc stimulating activity.
- > Increase plant cell development, leaf size and therefore photosynthesis.
- > In sandy soils, reduce soil permeability and stimulate germination.

THE FEATURES OF ADJUSTOR 747

ADJUSTOR 747 is an environmentally friendly product of which includes colloidal and molecular carbon, ionized Magnesium/Ammonium with elemental zinc in its formulation. When applied to soils, neutralize soil pH, reduce toxicity of Iron, Manganese and especially Aluminum excess.

ADJUSTOR 747 as foliar spray, neutralize sap pH, increase the formation of chlorophyll and therefore the translocation of carbohydrates and sugars and improve quality and appearance to the produce.

APPLICATION

CROP	RATE Lt/Ha	Water Lt/Ha	Critical Comments
Canola, pasture and winter crops	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply with or before planting As foliar spray before and after flowering.
Potatoes, Peanuts and summer crops	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply with or before planting As foliar spray before and after flowering.
Cherries, apples pome, stone fruits	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply post harvest As foliar spray before and after flowering.
Citrus, grapes and tropical fruits	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply post harvest As foliar spray before and after flowering.
Citrus, grapes and tropical fruits	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply post harvest As foliar spray before and after flowering.
Vegetables And Brassicas	10 - 20L 7 - 10L	Through Irrigation 300 - 500L	Apply at seeding or transplanting As foliar spray before and after flowering.

COMMENTS

- > ADJUSTOR can be mixed with Calcium and potassium nitrate, manganese copper and zinc sulphate products.
- > ADJUSTOR is compatible with Mancozeb, Zineb, Sulphur, Chlorotalonil, and copper fungicides.
- > Always dissolve companion products prior to adding Adjustor.
